§ 371 (c)(1),

(2), (4) Date: **Jul. 16, 2014**

A technique includes: comparing (a) measurements made at the first access node of transmissions made by a plurality of other access nodes against (b) measurements made at the communication device of transmissions made by said plurality of other access nodes; and deciding whether or not to select said first access node as a handover candidate for said communication device based at least partly on the result of said comparison.
